

# Platinum Resistance Thermometer Simulation

**Model 1146-Pt 100**  
**Model 1144-Pt 100**  
**Model 1144-Pt 500**  
**Model 1144-Pt 1000**

Code:	1144-Pt EN
Delivery:	ex stock
Warranty:	24 months

- More than 60 fixed temperature values from - 200 °C ... + 850 °C are in stock
- Calibration in acc. with DIN EN 60751
- ± 0.02 % tolerance for the models 1144-Pt 100, 1144-Pt 500 and 1144-Pt 1000
- ± 0.05 % tolerance from the resistance value in the range - 200 °C ... - 50 °C the model 1146-Pt 100

## Application

Today resistance thermometers are one of the important precision and operating measurement instruments of technical temperature measurement. Fast and easy testing of display, control and recording devices in measurement and process engineering is essential. Fixed temperature values can easily be simulated according to the characteristic curves of Pt100, Pt500 and Pt1000 using the precision resistors calibrated in °C (the inscription also includes the resistance value in Ω).

The small dimensions of the resistors allow the installation in measuring instruments or measuring circuits for comparison or control measurements.

Consideration of the ambient temperature is not necessary and the temperature coefficient of < 10 ppm of the used material MANGANIN® is negligible.

## Description

The precision resistors of the models 1144 and 1146 consist of low-capacity and low-inductance wire coils made of MANGANIN®, which are cast in small plastic cylinder housings.

Prior to comparison, the resistance bodies are exposed to a meticulous artificial aging procedure. This special method and comparison at approximately only half of the nominal tolerance guarantee long-term stability of < 0.02 % over the course of years.

**Resistance Values**

Temperature Value in °C		Resistance Value	Temperature Value in °C		Resistance Value	Temperature Value in °C		Resistance Value

**Technical Data**

Resistance material: MANGANIN®  
 Temperature coefficient: ≤ ±10 ppm/K  
 Error tolerance: class ± 0.02 % within range ≥ - 50 °C  
 class ± 0.05 % within range - 200 ... - 50 °C  
 Balance temperature: 23 °C  
 Balance point: for connecting wire of 5 mm length  
 Temperature range: - 200 ... + 850 °C  
 Basic values: calibrated acc. to DIN EN 60751  
 Coil design: graduated coil according to Chaperon  
 Long-term stability: < 0,02 % over years  
 Operating voltage: max. 500 V  
 Temperature range: 0 °C ... 85 °C  
 Temperature dependence:  $R_t = R_{20} [1 + \alpha_{20} (t-20) + \beta (t-20)^2]$   
 $\alpha_{20} = 0 \dots 20 \cdot 10^6$   
 $\beta = - 0.59 \cdot 10^6$   
 Short-time load: approx. 10 % < 1 min  
 Ultimate load: 0.7 W up to 25 °C environmental temperature  
 Surface temperature: max. 85 °C  
 results from heat dissipation and environmental temperature  
 Thermal resistance: 90 K/W  
 Specifications: according DIN 43783, part 1 (former VDE 410)  
 Dimensions: diameter 10.5 mm  
 length 18 mm  
 length of connecting wire 25 mm  
 Grid dimensions: 5 mm  
 Weight: ca. 3 g

**Order Code**

7 pcs **Model 1146-Pt100** - 100 °C  
 10 pcs **Model 1144-Pt100** + 100 °C  
 12 pcs **Model 1144-Pt500** + 50 °C  
 17 pcs **Model 1144-Pt1000** + 150 °C
